

## Using stereoscopic images with Virtual Reality headsets (Google Cardboard, Stealth VR etc.)

© Juliet Howden Licensor Historic Scotland

- **Download to your phone the image you'd like to view .**

You can do this directly from your phone's browser. Or you can download images to your computer and transfer them to your phone.

- **Insert phone into your VR viewer.**

Suggested viewers: <http://www.stealthvr.net/products/vr50/>

[https://store.google.com/product/google\\_cardboard](https://store.google.com/product/google_cardboard)

- **Adjust lenses in VR viewer (in/out, left/right) if required**

NB, in many phones, you can download multiple stereoscopic images to your phone and play them one after another as a slideshow.
